

TOM DAVIS

tomdavisparackal2003@gmail.com | 9446610602 | www.linkedin.com/in/tomdavis011 | [Portfolio](#)

PROFESSIONAL SUMMARY

Detail-oriented Technical Support Executive with L2/L3 experience in production systems, AWS, incident triage, case coordination, runbook creation, and high-volume queue management. B.Tech CSE (AI) graduate skilled in Python, AI/ML, and automation, with two socially relevant ML projects and hands-on experience building productivity-focused tools. Strong communicator with proven documentation and SLA-driven support capabilities. Comfortable working both onsite and remotely, and eager to contribute to reliable 24/7 operational support.

EDUCATION

BTech- Adi Shankara Institute of Engineering and Technology, Kalady

Computer Science(Artificial Intelligence) -

Nov 2021–May 2025

SKILLS

Python, C, HTML, CSS, JS, Java , OOPs,

ML Algorithms , AWS, AI algorithms , Deep learning, C , ticketing & knowledge bases

Github - <https://github.com/TomDavis2003>

WORK EXPERIENCE

Loanitol , Palarivattom

May 2025 - Present

Technical Executive- Product Development

- Own L2/L3 support for production tools written in Python: reproduce issues, provide fixes or workarounds, and coordinate patches with engineering and external IT teams.
- Monitor operational queues and triage incoming issues; prioritize by impact and SLA to ensure timely resolution and on-time deliverables.
- Write automated triage scripts and regression checks that help accelerate root-cause analysis and further reduce repeat incidents.
- Maintained and updated runbooks, shift logs, and onboarding documentation; created internal knowledge site (HTML/CSS/JS) to improve first-contact resolution.
- Lead incident response activities: runbooks, RCAs, and preventive change recommendations to reduce recurrence.
- Coordinates the cross-functional communication between customers, product managers, QA, engineering, and vendors to enable reports to be converted into reproducible tickets and drive fixes to meet SLAs.
- Mentor junior support staff and ensure that case handling and the steps of escalation are documented consistently.
- Python - libraries, frameworks; HTML, CSS, JS; AWS - S3, EC2, IAM; Ticketing & Knowledge Bases

PROJECTS

Kidney Transplantation using Explainable AI(May 2024 - Aug 2024)

Explored the use of XAI to enhance kidney transplant outcomes and organ scarcity. Utilized Random Forest and Gradient Boosting algorithms to predict graft survival and complication risks . We also added SHAP for explainability which shows what factors affected the result. We got this paper published in the IEEE Xplore after presenting it at 11th ICACC conference conducted at RSET, Kakkanad.

<https://ieeexplore.ieee.org/document/10845738>

Tools Used: Python, Jupyter Notebook, Random Forest, Gradient Boosting, SHAP, XAI

Prompt Injection Attack Detection System(July 2024 - April 2025)

Developed an AI-driven system to detect prompt injection attacks using LSTM (Long Short-Term Memory) networks for sequential text analysis. Integrated SHAP (SHapley Additive exPlanations) to enhance model interpretability by identifying which input tokens contributed to attack detection. Focused on improving security and transparency in large language model (LLM) interactions.

Leaf Disease Detection (Feb 2024 - May 2024)

Built a CNN-based model achieving 91 percent accuracy in detecting leaf diseases in real-time.
Enhanced model accuracy through data preprocessing and augmentation on diverse leaf images.

Tools Used: Python, Machine Learning

INTERNSHIP

Internship Certification in **Cybersecurity and Ethical hacking**

CERTIFICATIONS

Generative AI - 30 hour course certification
Fundamentals of AI (NPTEL Course)
Artificial Intelligence Foundation Certification by Infosys Springboard
Artificial Intelligence Primer Certification by Infosys Springboard
Minor Degree in Robotics and Automation.
Wheeled Mobile Robotics (NPTEL Course)

HONORS & AWARDS

Participated at National Entrepreneurship Conclave 2.0, 2024(NEC2.0), Entrepreneur-ship Bootcamp.
Campus Head - Game Development Club
Paper publication at 11th ICACC Conference (IEEE)
Co-author of a paper presented at ICTEST25
Cybersecurity and Ethical Hacking Internship at FACEIN Ltd
NSS Volunteer
Treasurer AI Club
Coordinator- Brahma'24, Brahma'25, Prayag
